ECORASTER FIRE LANE STANDARD

A driving surface of **Ecoraster** when properly installed and filled with gravel or seeded or sodded is capable of supporting and exceeding the imposed load of a fire apparatus weighing at least 85,000 pounds

Ecoraster supports loads exceeding AASHTO H-20 and HS-20 loading.

Ecoraster is tested to DIN 14090 standards and can support vehicles with at least 44,000lbs per axle. Ecoraster is testing to withstand at least 163,000lbs per square foot when filled with gravel.

Please refer to drawings and installation guides available for download on our website
